

RG3 welcomes you to its network of authorized re-sellers and is dedicated to providing innovative suspension related products and services which radically improve your customer's off-road and sport bike motorcycle's chassis and suspension performance.

With a international ad campaign and the exposure from several Pro Race Teams such as OTSFF/Rockstar Suzuki, Factory Suzuki Off Road Race Team, and Freestyle Riders Travis Pastrana and Brian Deegan the exposure for our products and services allow you to tap into the strength of our brand.

We are dedicated to supporting you and helping raise your sales goals. With this in mind, we are able to provide a variety of promotional items including such things as counter displays and floor displays, promotional fliers, stickers, decals, web banners, and promotional e-mails to send out to your customers. We are open to any ideas or suggestions along this line from you and look forward to building a strong relationship.

Sincerely,

A handwritten signature in black ink, appearing to read 'Rob R', followed by a horizontal line.

Suspension Service

If your shop does not offer custom suspension tuning services you could be losing a serious amount of service and parts revenue. Properly set-up suspension may be the most important part of what makes riding fun. Unfortunately, stock suspension comes with generic suspension settings and spring rates but one setting does not fit all.

Now through RG3's Dealer Suspension Program, you could service your customers with custom tuned suspension by one of the biggest names in performance suspension. The result is a set-up that is specifically geared to that individual rider's weight, skill level, and type of riding that he/she does.

Here's how you do it:

1. You promote custom suspension tuning/revalve service to your customers - (we will help you with promotional fliers, web graphics, etc.)
2. You charge your customers for what service they require. (not including wear parts or fluid plus shipping).
3. Ship (or drop off) your customer's suspension to RG3.
4. We do the service and ship it back to you, or drop ship to your customer direct as agreed and bill you at a dealer discount.

Products

We at RG3 take pride in our products, from our award winning Triple Clamps to our Smart Valves. We make sure everything is up to snuff and only produce a product if it will improve on an existing platform.

RG3 triple clamps utilize a unique, patented four post system that, unlike any other clamp on the market, provides all the advantages of a rubber-mounted system without the disadvantages. Rubber mount points stabilize the bar clamps while absorbing shock and vibration that would otherwise be transmitted to the rider's hands.

The RG3 linkage is fast becoming one of our most popular items as it is designed to remedy the problems of the stock linkage set-up you get with your bike. By calming down the leverage ratio of the overly-progressive stock setup, the RG3 linkage handles commonly found problems in acceleration chop and breaking bumps.

At low speed, the Smart Valve gives a controlled flow of fluid which handles the vagueness often felt at this speed. On the other hand, at high speed, fluid flow is often choked which gives a spikey feel to your ride. The Smart Valve is able to provide enough fluid flow at high speed to handle the spikey feel.
